♻ Sustainable Technology Solution

E-Revive

A Novel E-Waste Platform Maximizing Lifecycle Value Through Intelligent Classification & Resource Recovery

Problem & Novel Concept

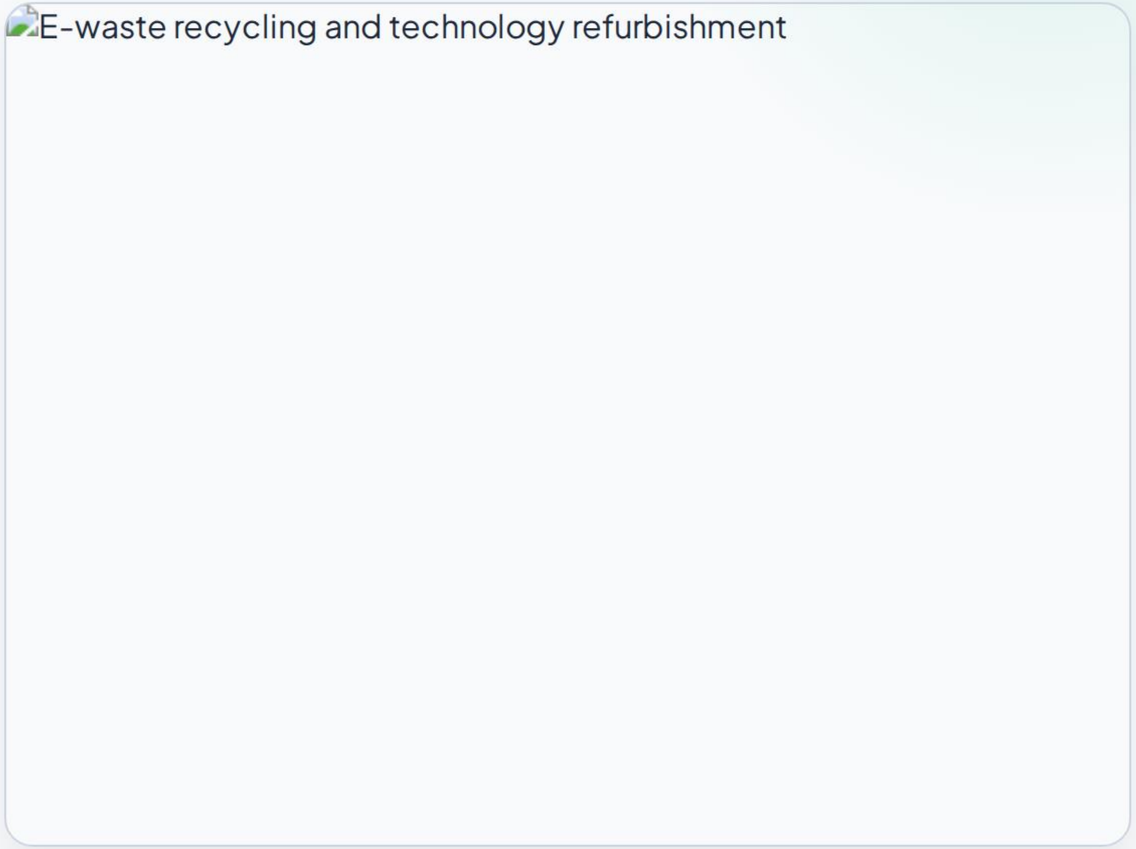

The Problem

Old electronics are discarded prematurely despite having repairable components or reusable spare parts, fueling e-waste growth and resource depletion.

The E-Revive Novelty

Replaces traditional **"Collect → Recycle"** with a value-maximizing lifecycle hierarchy:

Collect › Assess › Reuse › Refurbish › Parts Recovery › Recycle

Solution & Target Audience

1. Digital Registration

- Users register old electronics on the E-Revive platform.
- Simple online interface for device logging.

2. Assessment & Pickup

- Condition & residual value calculated automatically.
- Doorstep pickup arranged for customer convenience.

3. Target Audience

- **Students & Households:** Affordable tech & recycling.
- **Institutions:** Corporate offices, schools & colleges.

Revenue Model & Financial Potential

₹30K – ₹50K

Estimated Monthly Profit

Initial trajectory based on operating costs and e-waste collection volume.

Refurbished Device Sales

Reselling restored, tested electronic devices to price-conscious buyers.

Reusable Components

Harvesting functional spare parts for repair shops and makers.

Partner Commissions & Subscriptions

Commissions from authorized recyclers & institutional collection services.
